Traditionally Handcrafted Pillow Top Construction

SLEEPTECH BEDDING

FEATURES

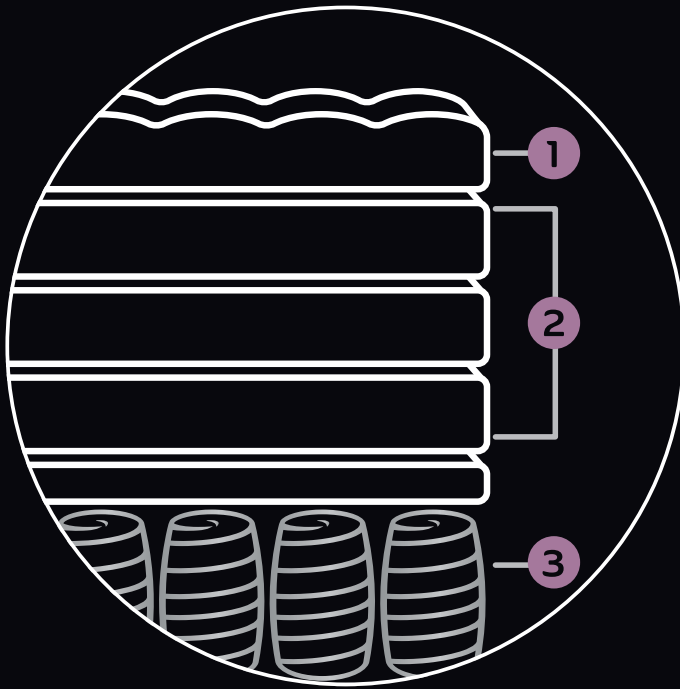

SLEEPTECH'S Posture Control features a 6 turn tri-zoned coil system that delivers pressure relieving comfort and total body support.

The high gauge centre third support core acts to disperse pressure and increase the conformance characteristics to the lower part of the sleeper's back.

Posture Control's support system delivers a sleep surface that supports your body where it needs it most.

- » Manufactured using Kiln Dried Plantation Timber
- » Fully Glued and Screw Nailed Timber Joints

Single Sided Pocketed Coil Technology
Traditionally Handcrafted Gusset Top Construction

SLEEPTECH BEDDING

FEATURES

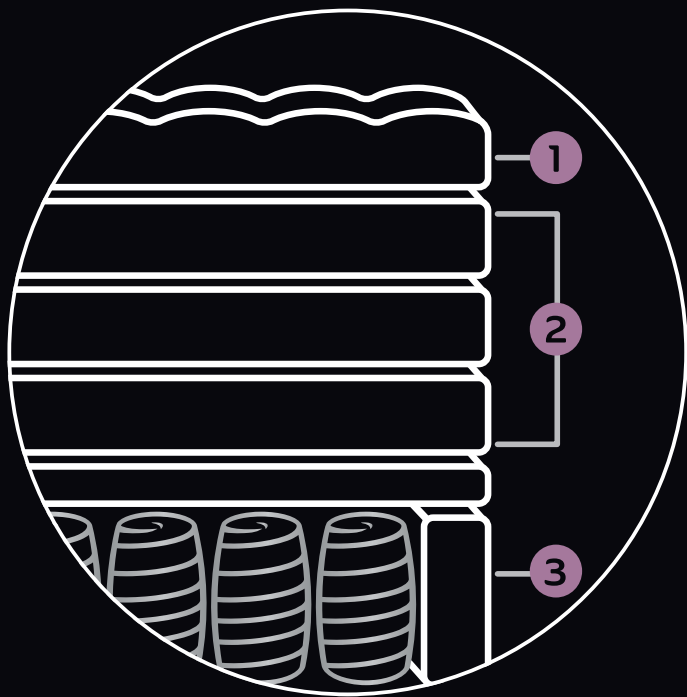

SLEEPTECH'S Posture Sensation offers a full width pocketed coil construction ensuring contouring support right to the very edge of the sleep surface.

A complex array of variable gauge coils ensures a stable surface that delivers the ideal support profile and minimises partner disturbance.

Posture Sensation's centre third zoning disperses pressure and provides additional support for the important lumbar region of the back.

SLEEPTECH BEDDING

FEATURES

SLEEPTECH'S Posture Perfect features a 5 Zone pocketed coil with high density foam box encasement and the very latest in high-tech premium conformance materials.

This combination of design components work together to promote a smooth transition from total body conformance to deep down orthopedically correct support.

Posture Perfect works with your unique body signature to relax your muscles and deliver a comforting and supportive sleep environment.
